About

As a third-year student, I possess strong proficiency in **C**, **data structures**, and **Java**. My expertise lies in efficiently managing and manipulating data using **C** and implementing robust **data structures**. Additionally, I am well-versed in **Java**, enabling me to develop versatile and scalable applications. Looking forward to applying these skills in challenging projects and further enhancing my programming capabilities.

Skills

- Technical: **HTML**, **CSS**, **JavaScript (React.js)**, **Java (JDBC, Swing)**, **C**, **DBMS**
- Tools & Technologies: **AutoCAD**, **Figma**

Projects

Quiz Website [Link](#)

- Description:** Developed a dynamic quiz website with a user-friendly interface. The project includes features like a signup page, a quiz section, and the functionality to generate certificates upon successful completion of the quiz.
- Tools & Technologies:** **HTML**, **CSS**, **JavaScript**

Chat Bot

- Description:** Built an interactive chatbot using **React.js**, which integrates with the **Gemini API** for content generation and the **Pixels API** for retrieving relevant images. The chatbot responds to user queries with both text and images, providing a dynamic and engaging experience.
- Tools & Technologies:** Frontend: **React.js**, APIs: **Gemini API**, **Pixels API**
